OUTDOOR LIGHTING

Hello,
nice to meet you
we are

LUTEC

CONNECTED BY LIGHTING

one LUTEC, one **lighting** world

We think that outdoor lighting is one field with different needs and approaches. Our main challenge, using our experience, is to propose creative solutions to enlighten your outdoor living space.

As LUTEC, we have made this open choice to embrace this field of activity most completely.

Architectural, with wall and ceiling decorative lamps, specific light effects, functional with directional or recessed lights, the garden, the paths and terraces... Entering in the solar lighting is more than trendy, the solar energy being an active part of our future.

Begun recently, the activity related to safety and comfort has gained importance. New connected camera ranges are developed. The world of colour and programming to manage all your lights now enters our collections.

One world, different faces, different segments developed with the same concern of quality and efficiency.

make your outdoor life smarter

Take absolute control

LUTEC introduces a range of Outdoor luminaires with the integrated WiZ connected light module. Combining high quality weatherproof aluminium fixtures with endless possibilities to control the powerful LED light.

Convenient & Welcoming

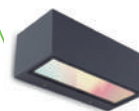

Get your outdoor lights to do everything you want and more. Triggered by your voice, remote or sensor, you'll always have the right light at the right time.

Comfortable & Personal

Create the perfect outdoor atmosphere for each occasion just like a lighting designer.

a light for every mood

security for your comFort

LUTEC launches the InMotion concept offering a complete range of Security Sensor Lights.

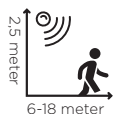

It's all about the sensor

The integrated PIR sensor equipped with multiple parameter settings enables the installation of a perfect detection system. The detection area varies from 12 metres up to 20 metres. The use of double sensors in the same luminaire assures a 100% full coverage. No one will pass unnoticed!

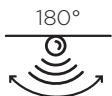

Perfect match with your home

The range is featuring now, besides the powerful flood lights with one or two heads, a number of very elegant designs which make a perfect match with the architecture of your house. The 2 stand-alone PIR sensors with multiple controls make the range complete.

Always connected with your home

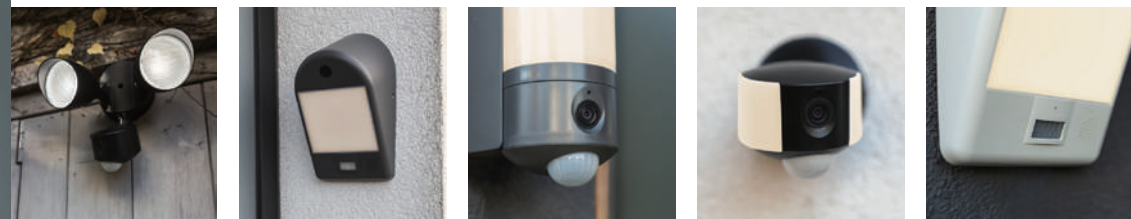

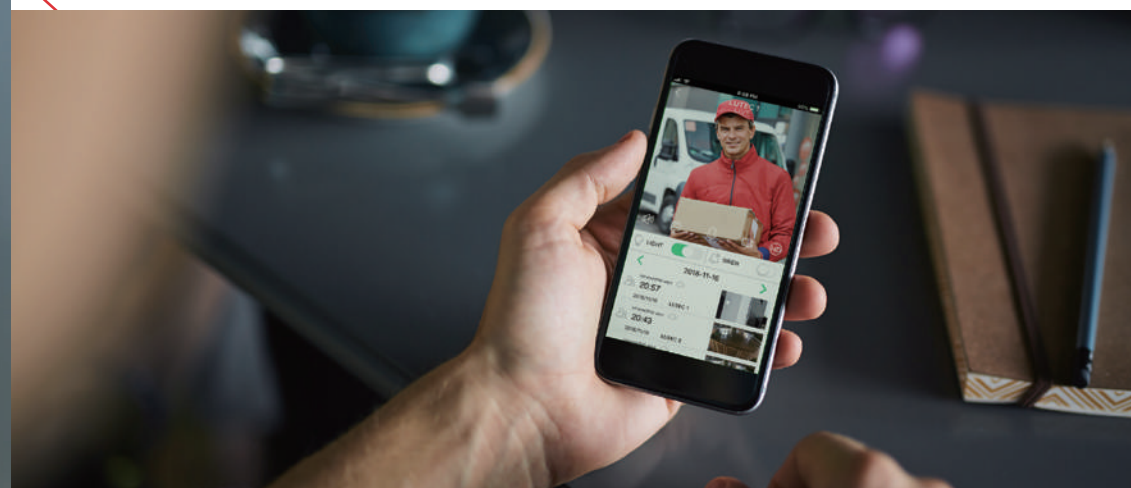

As market initiator LUTEC is proud to present the 2nd generation of the connected camera range.

Improved camera & connectivity

This brand new range has been developed based on learning and consumer insights over the last 3 years and by applying the gains and innovations of the fast evolving connected technology.

Keep an eye at your front door

This has resulted in a limited range of compact and very convenient camera lighting fixtures, ready to install or to make a swift replacement of your actual outdoor luminaires.

Give it your own twist

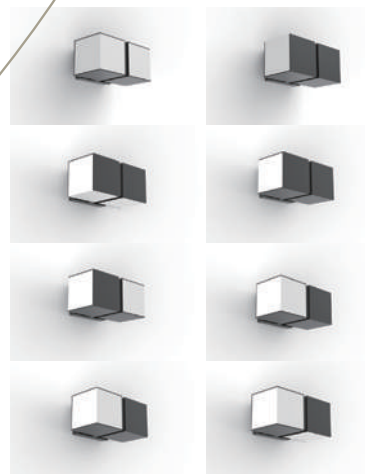

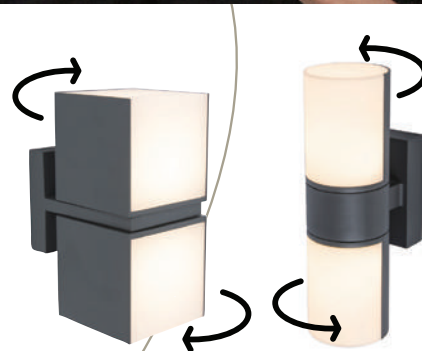

LED's have drastically changed and influenced the creation of new lighting products. The offer is responding to architectural variety, location and living contexts.

Become a lighting architect

Need for efficiency but also for harmonious integration when using one or several products: wall, bollards or ceiling designs are diversified but work and can be complementary.

Twist & light!

New in the LUTEC offer: luminaires with rotating light heads for versatile applications resulting in a magical outdoor light effect.

Solar? Yes, please!

LUTEC has a variety of different concepts covering the complete solar energy field.

A lighted flower

New in the portable offer is the POPPY Solar floor stand, the all in one lighting solution to enjoy your summer nights.

Party all night long

Designed for private gardens and for professional use on the terrace of your favourite restaurant or summer bar.

POPPY

ARCHITECTURAL applies to all lighting installations for homes, terraces and gardens covering a contemporary and modern design.

LED's have drastically influenced the creation of new lighting products. Need for efficiency but also for harmonious integration when using one or several products : wall, bollards, ceiling and bulkhead designs. The offer is responding to architectural variety, location and living contexts. A good match can be found in between the luminaire and the architectural elements, in form, colour or material.

tradition

TRADITION applies to all lighting installations for homes, terraces and gardens, covering a more classical design. Revisiting the traditional lantern theme with LED integrated versions. The Edison-fitting versions are suitable for the newest vintage filament LED bulbs, resulting in a perfect combination between new technology and authentic style. Matching with all kind of traditional homes : Classic, Vintage, Cottage. Resulting in a harmonious integration when using one or several products of the same family: wall lantern, pedestal, small and big lantern posts.

solar?
yes, please!

SOLAR covers a variety of different concepts in the field of renewable energy lighting solutions. The portable range illustrates light mobility, pleasant and ubiquitous to use. The wall lights and bollards are built following two principles, using an integrated or independent solar panel, quick and easy to install. Today the highly efficient solar panel in combination with powerful LED modules are giving a really satisfactory light level. Making the most out of the available solar energy is cleverly realised by intelligent user interfaces such as 3-step dimmers, timers and PIR-sensors.

integrated panel

Classic 6 side lantern powered with Solar energy. The almost invisible Solar panel at the roof of the lantern has a large capacity, with an autonomy of more than 10 hours during night time. Comes with 3 retrofit filament bulbs, creating a warm & gentle light. The die-cast aluminium post can be mounted on a paved surface thanks to the included metal mounting bracket. For unpaved surfaces, you can use the special spike, available as an accessory.

security for your comfort

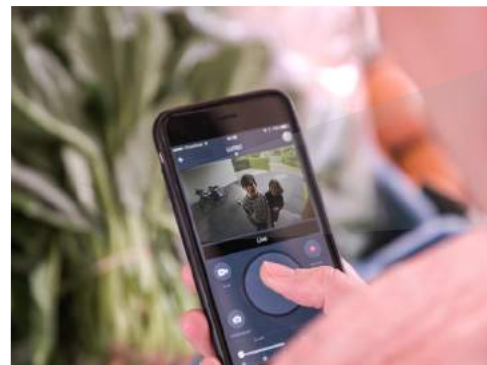

SECURITY consists of a versatile range focussing on safety applications around homes.

The **InMotion concept** offers a complete range of Security Sensor Lights, featuring powerful flood lights and a number of elegant wall lights. The integrated PIR-sensor equipped with multiple parameter settings enables the installation of a perfect detection system.

The **SECURY'LIGHT concept** and the new **CAMERA LIGHT concept** presenting outdoor luminaires with an integrated connected camera, fully controlled through the LUTEC app's running on smart devices.

SECURY'LIGHT
connected camera concept

Have full control with the fully adjustable app.

Feel safe with the comfortable feeling that SECURY'LIGHT keeps an eye on your home.

With SECURY'LIGHT everything is under control.

Get live notifications from what's happening at your home. Talk to your visitors and feel secure.

You can even take a picture or record a video from wherever you are.

Listen and talk live with your visitors.

You can record a video or go back in time. And you can remotely set of an alarm buzzer.

Get an alert whenever someone approaches your home.

The light automatically jumps on where there is motion detected.

SECURY'LIGHT will keep an eye on your home

«When light meets a camera,
when light means security»

with your home**

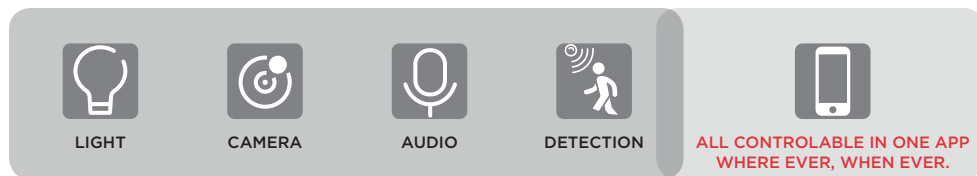

As market initiator LUTEC is proud to present the 2nd generation of the connected camera range.

This brand new range has been developed based on learning and consumer insights over the last 3 years and by applying the gains and innovations of the fast evolving connected technology.

This has resulted in a limited range of compact and very convenient camera lighting fixtures, ready to install or to make a swift replacement of your actual outdoor luminaires.

InMotion

Security Sensor Light

security for your **comFort**

LUTEC launches the InMotion concept offering a complete range of Security Sensor Lights.

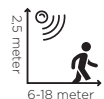

The range is featuring now, besides the powerful flood lights with one or two heads, a number of very elegant designs which make a perfect match with the architecture of your house. The 2 stand-alone PIR sensors with multiple controls make the range complete.

Passive infrared (PIR) motion sensor

How does it work?

A PIR sensor detects changes in the amount of infrared radiation and converts this changes into a switch-on signal.

When a person makes a movement within the detection reach, the sensor will detect a difference in infrared radiation in between the person's body and the environment.

Comfortable detection area

The detection area is a combination of the reach in distance and angle. An adjustable sensor can be tilted and/or turned and gives you full freedom.

Your personal settings

Time setting

As from the moment the sensor detects a movement the light stay on from 10 seconds upon 8 minutes according your preference.

Twilight setting

The environment brightness can be adjusted according your selection from night (10 lux) to daylight. In this way the light will switch into the "ON" position according the selected outside light level and not during the day.

Distance setting

You can limit the detection distance in accordance with the desired detection area. In this way you can avoid a movement detection outside your private grounds.

For your convenience

Dusk to dawn

Automatic light on switching as soon it's dark outside

Ambient Light

Light stays on all night long in a gentle ambient light, after movement detection the light switches on a powerful light beam.

Double sensor

Assures you a full detection not only frontal but also underneath the luminaire close to the wall.

Test mode

You can define the perfect detection area during installation in daylight situation

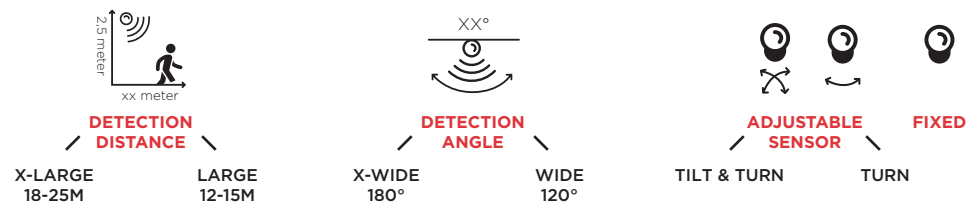

How to choose?

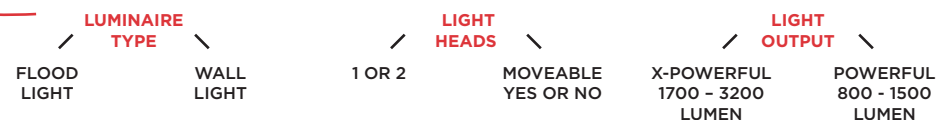

Check in a few steps which InMotion Security Sensor Light suits the best for your home situation.

BASED ON SENSOR DETECTION REACH

BASED ON LUMINAIRE CHARACTERISTICS

maya

wall

This compact Up & Down wall light with wide beam in aluminium with stainless steel cover has a timeless design. Discrete position of the black adjustable PIR motion sensor, makes it almost invisible.

Die Cast Aluminum

introducing our company

40 years of experience

The beginnings of a lighting company

Originally as a national aluminium die-cast factory, we acquired our first experience in outdoor lighting by producing bulkhead lights & classical garden lanterns. Our quality standards met international standards and the first export shipment was made in 1996. The new factory in the Far-East Industry park in Yuyao was operational in 2001, concentrating on modern garden & professional lighting resulting from a booming international DIY & ODM demand. From 2009 a close collaboration with the Design(Pool) had two objectives. To create a stronger offer for the ODM market and to launch a base for our future brand LUTEC. LUTEC was launched in 2010, focusing on architectural LED lights & introducing Solar Energy studies. This has resulted in the opening of a second production facility in 2012, fully devoted to future developments.

It is true, LUTEC is a young brand but it is built on a strong manufacturing experience. Manufacturing involves imagination and efficiency.

Why we decided to establish a brand?

The brand gives us a needed visibility. The brand allows us to anticipate the market, to make our own choices related to trends and to make developments such as we perceive them through our partners in different countries. Connected by lighting underlines our intention to develop products in accordance with the final consumers, through all our network and distribution channels. Now becoming a major player in lighting field, our main objective is to consolidate our offer through creativity, the design which involves a real level of quality and services.

Nowadays Lighting is both essential and magic.

The challenge of lighting is to create products which are a balance between the shape impact and attractiveness, and real functional values of use. The LED revolution has completely changed the game, giving us a lot of new opportunities. Added to this we must follow the latest technical innovations but also anticipate and provoke them, especially with solar energy and lighting control processes. To serve our objectives, we are reinforcing our international network and organisation: central warehouses in Belgium and China, establishing partners in new countries, the building of our corporate identity and also developing many different brand supports.

Future is already here Support the users

In our daily life we are surrounded by interactive and connected products. For many reasons it is evident for the lighting field to embrace this, among which is the ability to organise the light at will: temperature, color, control of the sensors, programming, energy saving and control, interactivity between several light points, security with camera, sound...

Our new APP, running on a smart phone, can help program and control all the information received through our products.

welcome to the lutec center

connected by lighting

The LUTEC centre is in our HQ in Yuyao. Located on the production site, it is an International meeting place where new concepts are elaborated, innovation & strategies are shared, discussed and studied.

We provide an expert platform in design, sales and services. We have the will to show and experiment different approaches creating choices for the short or medium terms. Staying close to our customers, which by extension also means the final consumers, allows the right design solutions to be found. Our team is trained for being reactive. The key to realize a win-win product is to always explore the possibilities, select and adapt, finding the adapted position.

In our view innovation is always closely linked to a right level of realization.

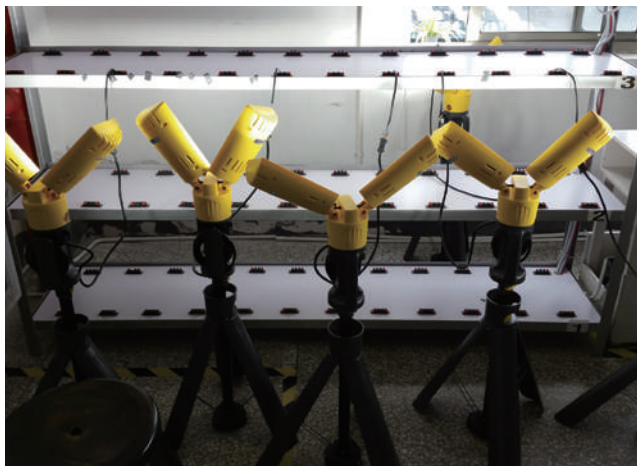

design & engineering

design, engineering & manuFacturing, all interactive.

One of the main decision we have taken in the LUTEC organisation is to break the walls between the different integrated services concerned by our product strategy. We have installed a culture of flowing communication between the services where everybody has a positive role to play in all projects. It works because we consider that we are all concerned in the success of a product.

We know that whatever the project it is complex and a number of obstacles have to be got through. To be as perfect as possible means working together: knowledge has to be shared at all levels. Creativity, marketing, engineering, production, communication, sales are all one and the same, totally linked.

warehousing & transport

global logistic Footprint assuring availability & proximity.

Today, we stock all A-items (150 sku's with high rotation) in the China Central Warehouse. (CCW). In this way we can guarantee an immediate shipment from the Ningbo harbor all over the world. The B & C items are made to order with a clever spareparts replenish system behind.

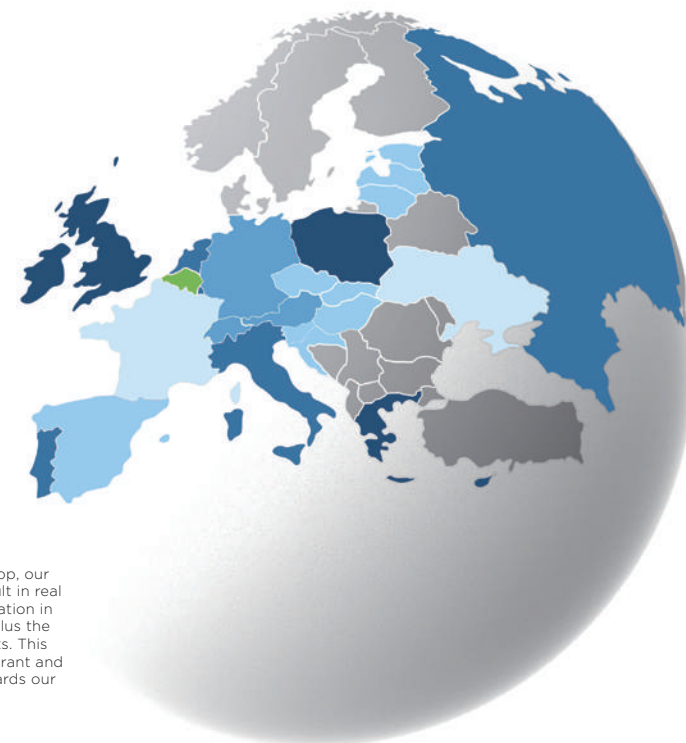

CCW

China Central
Warehouse
Yuyao - China

ECW

European Central
Warehouse
Bornem - Belgium

Since 2014, the European Central Warehouse is fully operational. This warehouse located in Belgium, centrally situated in Europe and operated by our logistic partner ACTIUS. Now we've also the possibility to assure different value adding services in the ECW. With a standard lead time of 1 week for all shipments to whatever place in Europe, the LUTEC articles are always within reach. We can offer different transport options: direct shipment, cross docking or pick-up, in close cooperation with our local Sales Cy & Distributors. Actually the ECW-portfolio contains the 200 best-running sku's.

With the LUTEC App, our Partners can consult in real time the stock situation in the CCW & ECW, plus the incoming shipments. This will lead to transparent and complete info towards our customers.

LUTEC quality

As a global supplier, our products are fully compliant with all technical & quality requirements of the different regions in the world.

All LUTEC LED articles benefit from a 5-years functional warranty. For the SOLAR range we apply a standard 2-years operational warranty.

The warranty conditions can be consulted on our website.

www.lutec.com/warranty

Integrated LED Light-engines

We apply in our designs the most appropriate LED light engine. Thanks to the in-house engineering and manufacturing in combination with a good relation with A-brand component suppliers, we're constantly improving the performance of the total LED-module. This results in a higher lumen/watt ratio but also in an improvement of the lumen/dollar ratio.

Low Energy Cost: -80% Energy consumption vs traditional lightsources

Long Lifetime: up to 20.000 hours

LUTEC LED-light engines featuring the most appropriate characteristics in order to give the best result for all your outdoor applications.

LUTEC works only with famous A-brand LED suppliers and strict requirements.

- Lumen Maintenance in time: 100% LM-80 test report
- Color deviation: 100% under 5-step MacAdam ellipse
- ERP compliant

The LED driver is the heart of the LED module and is the main influencer of the life-time. At LUTEC we develop these drivers according the engineering & design requirements. The manufacturing of the SMD's of these LUTEC-drivers is done on the in-house approved SMT assembly lines. In some cases we apply also drivers of A-brand suppliers. All drivers are compliant to all standard requirements and regulations. UL-GS-EMC-FCC-ERP

CREE **EVERLIGHT**

Lextar **LG**

PHILIPS LUMILEDS **OSRAM**

LUTEC

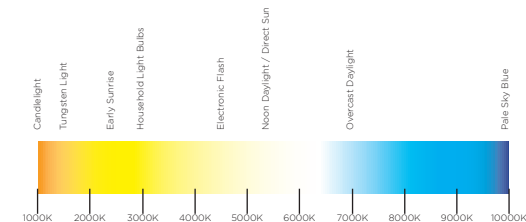

PHILIPS

SELF

HGPOWER

The **Light Color** or **Color Temperature** in Kelvin (K) gives a clear indication about "whiteness" of the LED light.

Standard we apply the 4000K Daylight. For most fixtures with diffuse light and vintage look a 3000K Warm White light is installed. The more functional work & security projectors have an integrated LED source with a 5000K Cool White light.

Color Temperature in Kelvin Scale

The **Color Rendering Index (CRI)** gives on a 0-100 scale an indication the color accuracy. Determining the ability of the light source to reveal the colors of the object faithfully in comparison with a natural light source. In all LUTEC fixtures we apply a CRI of minimum 80%. For Outdoor applications this is a more than satisfying level.

The **Luminous Flux** of an Outdoor fixture indicated in an nbr of Lumen (lm) is the total amount of light which comes out of the fixture in all directions. It gives a good measure of the brightness you can expect. This Lumen indication replaces on a clearer manner the previously used wattage.

	Standard	25 W	40 W	60 W	75 W	100 W
Halogen	18 W	28 W	42 W	53 W	70 W	
CFL	6 W	9 W	12 W	15 W	20 W	
LED	4 W	6 W	10 W	13 W	18 W	
Brightness Lumen	220	400	700	900	1300	

The **Luminous Efficacy** in Lumens/Watt gives a good measure of the optimal conversion of the electrical power into useful light. This is an important parameter with direct impact on the electric energy cost for your installation. Thanks to the continuous developments the LED solution is already today one of the most efficient light technologies. The Luminous Efficacy is one of the main parameters for the determination of the Energy Efficiency class.

According the EU regulation no 874/2012, about energy labelling of electrical lamps and luminaires, it's required that the consumers are informed about the Energy Efficiency class.

For all LUTEC articles this information is available on our website www.lutec.com.

All the LUTEC LED-fixtures featuring an **Energy Efficiency class A+ or better**.

This luminaire contains built-in LED lamps.

Ce luminaire comporte des lampes à LED intégrées.

Esta luminaria lleva lámparas LED incorporadas.

Acest corp de iluminat este prevăzut cu lămpi cu leduri integrate

W skład oprawy wchodzi wbudowane lampy LED.

Bu armatür LED lambalar yerleşik içerir.

Diese Leuchte enthält eingebaute LED-Lampen.

Этот светильник содержит встроенные светодиодные лампы.

Incorpora lămpadas LED

The lamps cannot be changed in the luminaire.

Les lampes de ce luminaire ne peuvent pas être changées.

Nie można wymieniać lamp w oprawie

Лампы светильника не могут быть заменены.

Las lámparas de esta luminaria no son reemplazables.

Lambalar armatürde değiştirilemez.

As lâmpadas não podem ser substituídas

Lămpile din acest corp de iluminat nu pot fi schimbate

Die Lampen können in der Leuchte nicht ausgetauscht werden.

874/2012

materials & finishes

For all LUTEC luminaires we apply the most appropriate high quality materials & finishes, all with an excellent weather proofness & mechanical strength to ensure a long lifetime.

Heavy duty die-cast Aluminum type ADC 12. Thickness of 2mm and a very good compactness, no air holes inside. In house fully automatic powder-coating & water painting-installation giving a perfect protection against corrosion.

LUTEC benifices from an in-house tooling workshop both for aluminum & synthetic components. This great asset & experience assures a high quality production.

Different types of premium Stainless Steel. For the ground recessed spots: 304 & 316 standards. For the wall & bollard versions: 201 & 202. Electrophoretic painting resulting in an extra protection layer.

Different kind of durable synthetics, depending on the application and form factors. For the fixtures: in most cases ABS, this is a strong, light-weighted material and can be used under low and high outdoor temperatures. For the diffusers: the impact proof and very resistant PC (polycarbonate) is used in opal or transparent version. Also clear glass, tempered glass and opal or clear PMMA (plexi-glass) are common in our designs.

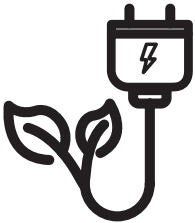

IP rating table

	Protection against solids		Protection against liquids
0	Not Protected	0	Not Protected
1	Protected against Solid Objects greater than 50mm	1	Protected against Dripping Water
2	Protected against Solid Objects greater than 12mm	2	Protected against Dripping Water when tilted to 15°
3	Protected against Solid Objects greater than 2.5mm	3	Protected against Spraying Water
4	Protected against Solid Objects greater than 1mm	4	Protected against Splashing Water
5	Dust Protected	5	Protected against Water Jets
6	Dust Tight	6	Protected against Heavy Seas
		7	Protected against the effects of Immersion
		8	Protected against Submersion

Color Indication

	Color Indication
●	Anthracite Grey
●	Silver Grey
●	Stainless Steel
●	White
●	Black
●	Green

●	Bronze

Sustainable vision

Over the last years we've made big steps forward to become a fully sustainable company. This on the level of manufacturing processes, resulting in a minimum impact on the environment. We are compliant to all Social Standards and are constantly improving the working conditions in our offices and production sites.

All our designs start from a sustainable mindset, offering our customers low energy consumption LED- solutions or fully energy neutral SOLAR energy alternatives.

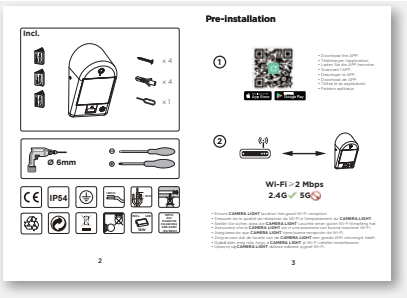

mounting, installation & maintenance

Instruction Manual

LUTEC pays a lot of attention to a consumer friendly mounting and foresee a variety of application possibilities, enhanced by specific & clever user-interfaces. Every LUTEC Outdoor fixture has a clear instruction manual in the unit box. This manual can also be downloaded on our website. The mounting and the installation is easy and fast. No specific tools are needed.

Service network

Our service network is available on global level through our LUTEC Partners. Contact details: www.lutec.com/services/global-network

LUTEC brand identity

packaging

The LUTEC corporate identity has been updated recently resulting in an actual look, completely in line with our evolving brand values, drivers & promises. New trade support tools are developed and can be used by our customers in a fully 360° communication. Creating an added value and differentiation versus our competitors.

LUTEC

CONNECTED BY LIGHTING

LUTEC launches in 2019 the fully refreshed packaging over its complete portfolio. After 5 years the time has come to make some important updates in an actual LUTEC brand look.

The look of the new packaging is fresh and vivid showing the consumer immediately the attractiveness of the products and possible applications.

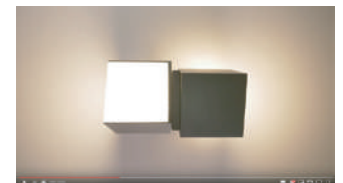

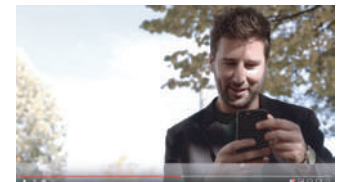

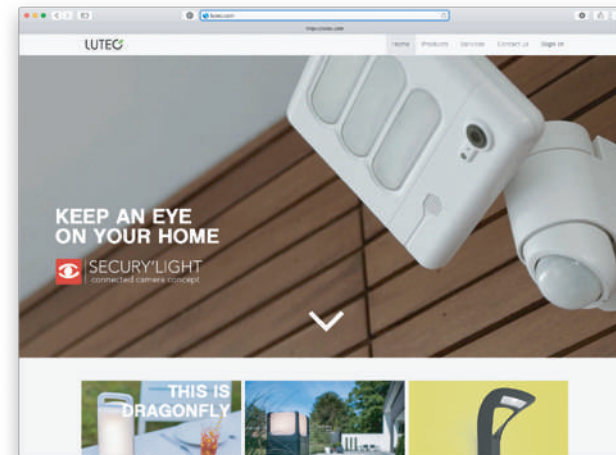

The product is the hero and gets the full attention with a clear picture. The renewed LUTEC logo with the green oval, is present on all sides. Together with the green banner this will further improve the brand recognition. The most relevant characteristics are shown in the feature box on the front, top and second side, this together with an in situation image. The lifestyle image on the front is repeated on the third side and creates the right atmosphere for each product activity segment. On the back side the complete technical information can be found, this with more details and a logic built up by means of clear icons. The EEL label and the short description translation in 8 languages makes the information complete.

LUTEC brand identity

rich content

We're constantly creating new communication materials to support and improve the introduction and consumer-service of our propositions. All these materials are easy accessible through our refreshed website www.lutec.com. There you can find the LUTEC database with all kind of "rich content": Atmosphere pictures, Lifestyle photo's, Tutorials, Inspirational video's, Flash-Intro video's, Unpack experiences, Rich texts, ...

This can be used for all kind of commercial & advertorial purposes. Also specific landing pages on your websites can be created in a convenient and attractive way resulting in a complete & dynamic content to inform and inspire the consumers about the LUTEC propositions.

LUTEC brand identity

in-store support

Based on consumer insights and specific requests from our customers, we're proposing a large number of in store support tools. Always starting from the same idea: the product - proposition is king, the consumer should be guided in a clear way facilitating his selection in a convenient way. Together with the refreshed look & feel of the LUTEC brand communication, we have adopted an inspiring and convincing communication for the different activity segments. After all a SOLAR light proposition requires another story than a CAMERA light solution.
